PERSONAL SUMMARY

Detail-oriented Software Developer with hands-on experience in full-stack web development, currently focusing on front-end design and user experience. Proficient in building responsive, user-friendly interfaces using HTML, CSS, and Bootstrap, with a working knowledge of JavaScript. Experienced in developing robust back-end logic and secure database integration using PHP and MySQL. Eager to grow as a front-end developer/engineer while delivering scalable, efficient web solutions that meet real business needs.

EXPERIENCE

Software Developer Intern, Neuralcore Jan - May 1, 2025

Binan, Laguna

- Built secure login with session handling and OTP email verification (PHP, MySQL, PHPMailer)
- Designed and developed payroll system UI and features, including attendance automation and real-time reporting, based on supervisor guidance
- Developed responsive UIs from Figma
- Used DataTables for sortable, paginated, and filterable dynamic tables
- Managed full CRUD with validated MySQL design and custom PHP logic
- Enabled bulk data import/export via PHPSpreadsheet
- Optimized layouts for all devices using CSS and media queries
- Handled deployments via GitHub and cPanel
- Fixed bugs, wrote documentation, ensured cross-browser compatibility
